1 The material aims to help you to reproduce the experi-  
2 ments in the paper.

## 3 **Alibaba Customer Service Dataset**

4 Due to the limitations, the data is available online through  
5 the link <https://github.com/anonymous-auth/aaai2021>.

6 The data is in a file in which a single row represents a dia-  
7 logue with multiple turns. Each row contains three columns  
8 separated by '\001', the first column contains a unique data  
9 id, the second column contains the sequence order of sen-  
10 tence ids for a dialogue, while the last column contains a  
11 json string to store the detailed information for each sen-  
12 tence id.

## 13 **The codes**

14 Due to the limitations, the codes and the instructions  
15 are available online through the link [https://github.com/](https://github.com/anonymous-auth/aaai2021)  
16 [anonymous-auth/aaai2021](https://github.com/anonymous-auth/aaai2021).
